

DURBOCEM

RENOVATION OF
DAMP WALLS.

Systems & technique

▶ **Durbocem** is the most suitable product to give walls with ugly damp spots, a neat and new look again. Durbocem is a solvent based acrylic paint for inside and outside, which adheres very well on damp walls contrary to other paints.

▶ With Durbocem, a unique product of Mathys, you have an efficient answer to give damp walls a face-lift. The ideal remedy to tackle problems and troubles of persistent damp: flaking walls, stains on plaster and masonry, damp walls in washrooms or garages, chalking surfaces (see directions for use). Durbocem can also be used outside: on damp walls of buildings, fences, garden walls, ... However Durbocem does not stop saltpetre efflorescence, is not resistant to high pressure of groundwater, and cannot be used as a waterproofing product. But then again, Durbocem, ... finally an efficient and succesful answer to ugly and damp walls.

DURBOCEM	
Colour	white
Packing	1L - 5L - 10L
Directions for use	<ul style="list-style-type: none"> Rub down and brush off chalking surfaces with a steel brush. Rub dry cracks, holes and fissures and fill up with special quick cement by means of a hawk or trowel and let harden thoroughly. Apply Durbocem (only on brick and concrete with porous surfaces): first coat with a semi-hard brush. Apply second coat after 24 hours with roller or brush. <p style="font-size: small;">Attention: work in a well ventilated area.</p>
