COLLECTION **DESIGN** DE MATHYS

BETON

CONCRETE EFFECT • IMITATION CONCRETE FOR A PURE AND MODERN EFFECT

imitation concrete for a pure and modern effect

Colourful shades and designs are well and truly on the up, but clean elements can still be found in the contemporary interior. One of these is the concrete-look wall, which is being used not just in shops, offices and catering establishments, but also, more and more frequently can be found in private dwellings. It is a clean and simple basis for diverse styles.

Cachemire® Beton can be used to create a classic or clean and modern atmosphere. All this depends on the way in which it is applied and the choice of colour. The colour palette doesn't simply give you the option of imitating concrete tones but also that of using trendy colours to create accents.

Cachemire® Beton, a unique clean effect, easy to apply and tintable in many Cachemire® colours. For a wall with character.

cachemire® TIP

After application Cachemire® Beton can be finished off with our Cachemire® Beton Finish protective varnish or with Cachemire® Metallic Finish for a luminous finish.

welcome in the cachemire® universe
